                                                       left to right
                                                       left to right
                       WeChat: cstutorcs
                                                       left to right
22
left to right
                                                       right to left
?:
= += -= *= /= %= &= ^= != <<= >>=
                                                       right to left
                                                       left to right
•
```

- ->, (), and [] have high precedence, with * and & just below
- Unary +, -, and * have higher precedence than binary forms

C Pointer Declarations: Test Yourself!

```
int *p
                                 p is a pointer to int
int *p[13]
                                 p is an array[13] of pointer to int
int *(p[13])
                                 p is an array[13] of pointer to int
                  Assignment Project Exam Help
                                 p is a pointer to a pointer to an int
int **p
                        https://tutorcs.com
p is a pointer to an array[13] of int
int (*p)[13]
                        WeChata Gatutoreturning a pointer to int
int *f()
                                 f is a pointer to a function returning int
int (*f)()
```

Dereferencing Bad Pointers

The classic scanf bug

```
int val;
... Assignment Project Exam Help
scanf("%d", valt)tps://tutorcs.com
```

WeChat: cstutorcs

Reading Uninitialized Memory

Assuming that heap data is initialized to zero

```
/* return y = Ax */
int *matvec(int **A, int *x) {
   int *yAssignment*Project(Engin; Help
   int i, j;
             https://tutorcs.com
   for (i=0; i<N; i++)
      for (j=WeChatjestutorcs
         y[i] += A[i][j]*x[j];
   return y;
```

Allocating the (possibly) wrong sized object

```
int **p;

Assignment Project Exam Help
p = malloc(N*sizeof(int));

https://tutorcs.com
for (i=0; i<N; i++) {
   p[i] = malloc(M*sizeof(int));
}</pre>
```

Off-by-one error

Not checking the max string size

Basis for classic buffer overflow attacks

Misunderstanding pointer arithmetic
